

A workshop for HVAC contractors & building pros

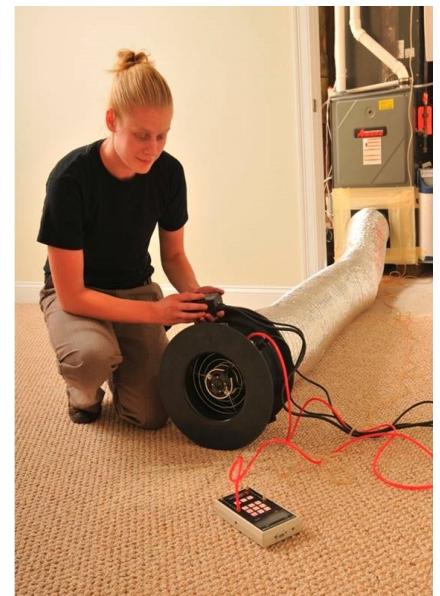

Smart Building: High Performance HVAC

The new Massachusetts building code carries with it a number of additional requirements regarding both the sizing of mechanical systems and the installation of their associated ductwork. This workshop will provide a detailed description of the new code requirements and help to you increase customer satisfaction and reduce callbacks.

This workshop will cover:

- Code Changes
- Performance Testing
- Tips and Tricks for Duct Sealing
- ACCA Manual J, S, and D
- Resources and Guidance
- Rebates and Incentives

8:00–11:00 am—Various locations throughout Massachusetts this fall

Smart Building Workshops
